

Lifestyle Management Solution

Our customer is one of the premier Law Enforcement Agencies in the Middle East serving over a million residents.

About the Customer

Our customer is one of the premier Law Enforcement Agencies in the Middle East serving over a million residents.

The Business Case

The customer had a strict health and wellness regime in place for its employees which included diet schedules, physical training, gymnasium activities, etc. and wanted to electronically manage the schedules and programs in this initiative. Their ideal requirements were

- Eliminate manual paper based management of fitness programs
- Digital management of fitness activities
- Progress tracking
- Report generation for stakeholders

Our Solution

Our solution engineers worked closely with the customer to deliver an end to end solution to electronically manage all training and diet programs that were in place. The solution empowered the customer to have a birds eye view of the fitness program with detailed report generation capabilities that determined future course of action.

Solution Achievements

Technodx built a custom Management System for the customer with integrated tracking capabilities using RFID and Barcode readers. The system offered stakeholders across the value chain with consolidated information insights from all global warehouse locations on a central portal. It offered multiple insights such as

- Manage schedules
- Tracking progress
- Secure mobile app for access within gym premises via Sencha touch
- Report generation and print support using AirPrint
